Protecting people and the environment from the effects of hose failure.

Eaton's new Guardian Sleeve is designed to protect against damage or injury which may result from a hydraulic hose failure. The ultra-tight weave disperses pressure and fluids that may escape during a hose burst or pinhole leak. With this new "line of sight" sleeving, both equipment operators and the environment are guarded from the effects of hose failures.

Benefits

- Meets new line of sight operator specification EN982 ISO norm 833 EN414 and ISO 3457

- The ultra tight weave resists oil spillage from hose failure

- Meets ASTM D6770 for abrasion resistance of textile webbing

- Meets abrasion standard ISO 6945

- Meets Fed-STD191-Test Method 5309 for abrasion

- Densely twisted polyamide 6 yarn offers optimum UV and abrasion protection

- MSHA approved # IC-234/0 – Meets standard application procedures for acceptance of Flame Resistance Solid Products taken into mines

- Meets Conductivity Requirements of ISO 8031

- Tight, smooth surface resists wear

Chemical Compatibility Chart for Guardian Sleeving

Chemical	Compatibility
Gasoline	Very Good
Oil	Very Good
Mineral and Vegetable Oil	Very Good

Assembly Instructions

1. Select the correct sleeve part number for the hose as outlined in the Table 2.
2. Cut the sleeve 2 inches longer than the cut length of the hose to allow full hose bend radius.
3. The ends of the sleeves must be seared to prevent sleeve from fraying.
4. Slide the sleeve over the hose.
5. Properly assemble the hose ends.
6. Secure the sleeve over hose sockets with a metal banding product.
